SKILLS:

- ➔ HTML
- ➔ CSS
- ➔ Foundation CSS
- ➔ JavaScript
- ➔ Dedicated
- ➔ Hard-Working

OBJECTIVE:

Having pursued a higher education with a focus on IT Professional courses, my goal is to have a fulfilling career that I enjoy and helps me grow. With my problem-solving skills and determination, I believe I cause positive change in any team I am lucky enough to be a part of. I even bring my own dad jokes!

EXPERIENCE:**Software Engineer Intern | StudySoup — March 2022 - May 2022**

My job was to assist StudySoup's CTO in updating their user experience while learning as much as I could. My work revolved around improving how users viewed and navigated the site, and even adding new components when needed.

Full Time Student | Edmonds College — September 2019 - August 2021

Most people might not list their time at school as part of their experience, but let's be honest, you're curious about the employment gap. I was injured at work in 2016, eventually earned the opportunity to find a retraining program so I decided on Web Development and chose Edmonds College. There's always more to the story, but that's what interviews are for!

Merchandiser | Odom Corp — December 2015 - May 2016

Represented the company when dealing with clients, kept track of current inventory, stocked all products throughout each store, and coordinated closely with other merchandisers and our sales team.

Assistant Manager | S&S Petroleum — April 2015 - December 2015

I was responsible for payroll, scheduling, invoices, communicating with vendors, and managing a team of 4 - 7 employees. All of this needed to be done daily and with no training at all, so I pushed myself to figure it all out and got it done.

EDUCATION:**Edmonds College — Edmonds, WA****Associate of Technical Arts Degree, Web Application and Cloud Development, 2021**

I received my two-year degree with a 3.9GPA and was on the honor roll for each of the 8 quarters I attended. Most courses focused on Web and Cloud Development, especially regarding Front-End Development.
